DURABLE HIGH-SPEED PERFORMANCE

The new high speed Pro Series features many improvements designed to increase the functionality and durability of TSC's flagship industrial printer line.

PRO SERIES ENHANCEMENTS

The TTP-2410M Pro Series is based on the proven TTP-2410M platform with many significant changes. The new Pro Series features a separate die-cast aluminium base plate and backplane that includes a metal media supply spindle and sturdy two roller damper. This new design results in a more durable printer that is suited for your most heavy-duty demand cycles.

Other enhancements include a new motor mount for quieter printing, a gap sensor lock to keep the label sensor from shifting, and a new anti-static ribbon brush. Finally, TSC has added an optional USB Host option for applications that require the use of either a USB scanner or keyboard.

SUPERB RESOLUTION, GREAT WARRANTY

There are three models available with the TTP-2410M Pro Series. The TTP-2410M Pro prints at 203 dpi at speeds up to twelve inches per second, TTP-346M Pro offers 300-dpi resolution at speeds up to eight inches per second, and the TTP-644M Pro features 600 dpi resolution which makes it ideal for printing very small 2D barcodes, graphics, fine print and other ultra-high-resolution images. All TSC printers feature a standard two-year limited warranty.

LOADED WITH STANDARD FEATURES

The TTP-2410M Pro Series printers are loaded with standard features including support for 600 meter ribbons, 8.2"OD media rolls, a large 6-button LCD display, built-in Ethernet, a PS/2 keyboard interface, and USB 2.0, parallel and serial interfaces. An industry-standard GPIO port or a USB Host port is available as an option.

MEMORY TO SPARE

The Pro Series offers plenty of memory, including 32 MB SDRAM

and 8 MB FLASH, which provides easy storage of fonts, international character sets and graphics. The Pro Series also includes a secure digital (SD) FLASH memory card slot for inexpensively adding up to 4 GB of memory.

ECONOMY MODELS

Built specifically for the budget–minded, the TTP-246M Pro 203 dpi and TTP-344M Pro 300 dpi printers offer the same heavy duty design of the TTP-2410M Pro but operate at slower speeds. The Plus standard features include a 6-button LCD display, 8 MB SDRAM, 4 MB FLASH with serial, parallel and USB connectivity, and optional internal Ethernet networking for simple integration.

POWERFUL TSPL-EZ™ PRINTER PROGRAMMING LANGUAGETSC ships TSPL-EZ™ firmware in all its printers. TSPL-EZ™ supports three different printer languages including TSC printer language, TPLE (Translation Printer Language Eltron), and TPLZ (Translation Printer Language Zebra). TSPL-EZ™ features internal scalable True Type fonts, and a BASIC interpreter with file manager for creating powerful printer interface applications with multiple type of hosts.

KEY SERIES FEATURES

- Ethernet, USB 2.0, serial and parallel connectivity are standard.
- ▶ Heavy duty die-cast aluminum design
- ▶ 300 dpi & 600 dpi resolution options
- ► 600 meter ribbon supply ► Large LCD display with 6-button menus
- ▶ 8 MB FLASH and 32 MB SDRAM memory
- SD FLASH memory expansion up to 4 GB
- ▶ Up to 305 mm (12") per sec. print speed
- ▶ 32 bit RISC processor
- ▶ PS/2 keyboard interface for stand-alone printing
- ► TSPL-EZTM firmware for plug-n-play ease
- ▶ Powerful basic programming tools
- Doptions include: USB Host for use with keyboards and scanners; peel, present & rewind; General purpose IO connectivity; knife & rotary cutters
